Your Opportunity to Own This Amazingly Versatile Tool...

The "Little Torch" from

Instrument
DIVISION

Precision Torch for 1001 Miniature Applications

Ideal for Laboratories, Research and Development, Electronic Production and Repair, Dental Labs, Jewelry Making and Miniature Machinery

The Little Torch is a precision engineered, highly versatile instrument capable of doing seemingly impossible tasks with ease. It can use four different kinds of fuels with oxygen—acetylene, hydrogen, LP or natural gas—and provides different flame characteristics with each. It produces a perfectly controlled, completely stable flame with temperatures up to 6300° F., that's hot enough to melt commercially weldable metals, glass, or even ceramics.

No wonder the Little Torch is being used to do an infinite variety of jobs from experimental laboratory work to aircraft maintenance; and, without fail users are being surprised by the Little Torch's capacity for doing impossible jobs with facility.

IDEAL FOR ANY MINIATURE FABRICATION OR MAINTENANCE JOB

Applications for the Little Torch are limited only by the user's imagination. For small, even microscopic work, in hard to reach places, and small spaces . . . the Little Torch provides versatility, maneuverability and a needle point flame for precision welding, brazing, soldering or heating. And the Little Torch is safe to use, UL listed. It is backed by Tescom Corporation's reputation for superior products, dependability, and the experience gained through 45 years of producing this type of equipment.

WELDS with incomparable precision—.002" copper wire up to 16 ga. steel, to plastics, glass and even ceramics.

BRAZES miniature components with accuracy. Ideal for precision heat joining of high temperature alloys.

HEATS any material to extreme temperatures. Offering a 6300° F. flame in a large variety of flame settings and sizes.

SOLDERS with amazing versatility. Uses hard or soft solder. Can provide perfect adhesion and capillary action.
